

Spenny Piggy Payments & Reserve System Spec

(Developer Document)

Overview

This document defines the required backend logic, admin controls, and frontend creator experience to ensure a Stripe-safe, audit-ready payments and reserve system.

1. Rolling Reserve Logic

All new creators are subject to a rolling reserve during their first 30 days.

Rule	Value
Reserve % (New Creators)	10%
Duration	30 days
Release	Auto-release during Friday payout cycle if no disputes
Escalation	Increase to 20–40% if risk triggers

2. Reserve Types

Type	Description
Rolling Reserve	Percentage held for X days then released
Fixed Reserve	Minimum balance held at all times
Dynamic Reserve	Adjusts based on risk signals

3. Reserve Release Rules

Condition	Action
No disputes within hold period	Release reserve
Risk level = Low	Release reserve
Manual review required	Hold until approved

4. Friday Payout System

All payouts operate on a weekly cycle.

Day	Action
Mon–Thurs	System tracks payments and flags risk

Thursday	Admin review dashboard
Friday	Admin approves payouts
Post-Approval	Stripe payouts triggered

5. Admin Dashboard Requirements

Developers must ensure the following UI and controls exist:

Feature	Requirement
Reserve Breakdown	Per creator reserve amount and %
Release Schedule	Show when funds unlock
Risk Flags	Display triggers and reasons
Bulk Approve Button	Approve all payouts Friday
Manual Override	Adjust reserves or delays

6. Creator Frontend Experience

Creators must have full transparency:

Feature	Requirement
Balance View	Available vs Reserved funds
Notifications	Reserve applied, released, or escalated
Payout Timeline	Next payout date shown
Risk Status	Low / Medium / High

7. Notification System (Critical)

System must automatically notify creators when:

Trigger	Notification
Reserve applied	Email + in-app alert
Reserve released	Confirmation
Payout delayed	Reason provided
Risk status change	Alert with explanation

8. Negative Balance Protection

Rule	Action
Negative balance detected	Increase reserve

Threshold exceeded	Freeze payouts
Recovery	Deduct from future earnings

9. Audit Logs (Mandatory)

All actions must be logged for Stripe compliance.

Log Item	Details
Trigger Fired	Which rule activated
Timestamp	Exact time
Action Taken	Reserve, delay, freeze
Admin Override	If manual change applied

10. System Goal

This system ensures prevention, containment, and recovery of payment risk while maintaining creator trust and Stripe compliance.
