

Spenny Piggy

Finance Dashboard, Creator Payouts, Revenue Ledger & Founder Bonus Implementation Spec

Developer build document for admin finance visibility, Stripe Connect reporting, payout approval, founder bonus tracking, and bank/accountant-ready exports.

Core principle: Stripe Connect direct charges mean creator payments sit on creator connected accounts. Spenny Piggy must maintain its own internal ledger from checkout records and Stripe events. The Stripe dashboard alone is not enough to run the business, reconcile revenue, prove GMV, or calculate founder bonus liabilities.

1. Build Objective

- **Revenue Overview:** show what Spenny Piggy makes from platform fees, transaction fees, membership fees, compliance fees and any other platform-controlled revenue.
- **Creator Payments:** show what creators are owed, what is payable this Friday, what is held in reserve, and what needs manual review.
- **Founder Bonus:** track eligible creators who may receive an additional 10% monthly bonus funded by Spenny Piggy. This must be separate from standard creator payouts.
- **Reports:** export bank, lender, accountant, processor and internal management reports.

Admin Section	Purpose	Answers
Revenue Overview	Platform performance and fees earned	How much GMV did we process? How much revenue did Spenny Piggy earn? What is the take rate?
Creator Payouts	Weekly payout control	Who is due money? What is held? What requires review before Friday payout?
Founder Bonus	Monthly bonus liability tracking	Who qualified? How much extra is owed? Has it been approved and paid?
Reports & Exports	Evidence pack creation	Can we export proof of revenue, payouts, reserves and liabilities?

2. Revenue Overview - Required Metrics

Metric	Definition	Notes
GMV	Total fan/customer spend including all fees	Headline processing volume.
Creator Net Amount	Total amount creators earned before reserves and bonus	Not Spenny Piggy revenue.
Platform Fee Revenue	Application/platform percentage fee collected by Spenny Piggy	Primary revenue line.
Transaction Fee Revenue	Fixed £1 or equivalent transaction/admin fee	Show separately from percentage fee.
Membership Revenue	Creator subscription fees, if applicable	Show gross and net of VAT where possible.

Metric	Definition	Notes
Stripe Fees	Processing costs where borne by platform/supporter	Needed for true margin.
VAT Collected / VAT Liability	VAT component on platform fees/subscriptions where applicable	Exportable for accountants.
Net Platform Revenue	Platform revenue minus direct processing costs and VAT liability	Closest operational revenue figure.
Take Rate	Platform revenue divided by GMV	Show gross and net take rate.

Important: Do not use only the Spenny Piggy Stripe balance as business performance. The internal ledger must be the source of truth.

3. Creator Payout Dashboard

Metric / Control	Requirement
Pay Period	Default calculation window: Friday 00:00 to Thursday 23:59. Admin reviews Thursday and approves Friday payout.
Creator Due Amount	Creator earnings for the period minus reserves, refunds, disputes, chargeback holds and other deductions.
Reserve Held	Show rolling reserve amount. New creators may have 10% reserve for first 30 days if active.
Reserve Release	Show reserve amounts eligible for Friday release.
Payout Status	Pending Review, Approved, Sent, Held, Failed, Escalated.
Manual Override	Admin can hold/release payout with reason code and audit log.
Risk Flags	Disputes, refund spikes, suspicious supporter behaviour, KYC issue, content moderation issue.

4. Founder Bonus - Monthly Liability Module

Founder bonus must be tracked separately from standard creator payouts so it does not distort weekly payout balances, reserves, Stripe Connect reporting, or normal creator earnings.

Current known rule: eligible creators may receive an extra 10% bonus funded by Spenny Piggy. This should be paid manually each month after eligibility has been confirmed. Final commercial rules should be configurable in admin.

Dashboard Card	Definition
Potential Bonus Liability	Estimated total bonus owed this month based on current eligible creator volume.
Confirmed Bonus Liability	Amount confirmed after month-end eligibility checks.
Bonus Paid	Amount already paid this month.
Bonus Remaining	Confirmed liability minus paid amount.
Eligible Creators	Number of creators marked eligible.
Creators Pending Review	Creators who may qualify but require manual confirmation.

Creator-Level Field	Description
founder_bonus_status	Not Eligible, Potentially Eligible, Eligible, Suspended, Expired.
founder_bonus_rate	Default 10%, but configurable.
founder_bonus_basis	Define whether bonus is based on creator earnings, supporter volume, or platform fee share. This must be locked before launch.
eligibility_start_date / eligibility_end_date	Start and end dates for the scheme, including any 12-month eligibility window.
monthly_qualifying_amount	Amount used to test qualification for the month.
bonus_amount_due	Calculated bonus amount for the month.
bonus_approval_status	Pending, Approved, Rejected, Paid.
bonus_payment_reference	Manual bank/Stripe/payment reference once paid.

Founder Bonus Flow: month-end calculation -> admin review -> approval/rejection -> monthly liability report -> manual payment -> payment reference recorded -> audit log locked.

5. Transaction Ledger - Required Data Model

Column	Purpose
transaction_id	Internal unique transaction ID.
stripe_payment_intent_id / stripe_charge_id	Stripe payment references.
stripe_application_fee_id	Stripe application fee reference.
connected_account_id	Creator Stripe connected account ID.

Column	Purpose
creator_id	Internal creator user ID.
gifter_id / guest_email	User ID or guest email used at checkout.
currency	Currency charged.
fan_paid_total	Final all-in amount paid by fan.
creator_price	Amount creator listed and should receive before holds/reserves.
platform_percentage_fee	Spenny Piggy percentage fee amount.
platform_fixed_fee	Fixed transaction/admin fee amount.
stripe_fee_estimate / actual	Stripe processing fee, if available from balance transaction.
vat_amount	VAT amount applicable to platform fees/subscriptions.
reserve_amount	Amount held back under reserve policy.
creator_payable_amount	Creator amount due after reserve/holds.
status	Succeeded, refunded, disputed, reversed, failed.
created_at / updated_at	Timestamps.

6. Stripe Event Mapping

Event	Use
checkout.session.completed	Confirms checkout completed and maps product/cart/user metadata.
payment_intent.succeeded	Confirms successful payment.
charge.succeeded	Captures charge and balance transaction references.
application_fee.created	Confirms Spenny Piggy fee collected.
charge.refunded	Updates refunds and revenue/payout impact.
charge.dispute.created	Flags creator payout hold and risk review.
application_fee.refunded	Adjusts Spenny Piggy revenue where fee is refunded.

7. Reports & Export Requirements

Report	Required Fields
Revenue Summary	Date range, GMV, platform fees, fixed fees, membership revenue, Stripe fees, VAT, net revenue, take rate.
Creator Payout Report	Creator ID/name, period earnings, reserves, deductions, approved payout, payout status.
Founder Bonus Report	Creator, eligibility status, qualifying amount, bonus rate, bonus due, approval status, payment reference.
Transaction Ledger Export	All ledger columns for selected date range.
Bank/Lender Summary	Monthly GMV, monthly revenue, net platform revenue, creator liabilities, bonus liabilities, cash position.
VAT/Accounting Export	VAT by fee type, invoice/receipt references, revenue categories, currency.

8. Admin Controls & Permissions

- Only finance/admin roles should access the finance dashboard.
- Only senior admin/founder role can approve payout holds, reserve releases, and founder bonus payments.
- Every manual edit must require a reason code and be audit logged.
- Exports must include generated_by, generated_at, date_range, and report_id.
- Reports should be immutable once generated, or regenerated with a new version number.

9. Acceptance Criteria

- Admin can see total GMV, platform revenue, creator payable amounts, reserves, and founder bonus liability for any date range.

- Every successful checkout creates a complete transaction ledger row.
- Application fees reconcile against Stripe application_fee.created events.
- Creator payout dashboard separates standard payouts from founder bonus liabilities.
- Founder bonus can be calculated monthly, manually approved, marked paid, and exported.
- CSV and PDF exports are available for revenue, creator payouts, founder bonus, full ledger, and bank/lender summaries.
- Refunds, disputes and fee refunds update reports correctly and create audit log entries.
- No report relies solely on the platform Stripe balance as the source of truth.

Priority	Item	Reason
P0	Transaction ledger + Stripe webhook mapping	Foundation for all reporting and payout calculations.
P0	Revenue overview dashboard	Founder needs to know if the business is making money.
P0	Creator payout dashboard	Required for Thursday review and Friday payouts.
P1	Founder bonus liability module	Needed before first monthly bonus is due.
P1	CSV exports	Needed for accountants, banks and reconciliation.
P2	PDF reports and lender pack	Useful once revenue is consistent.
